

HEALTH REQUIREMENTS FOR NEW STUDENTS ENTERING THE EDWARD W. BROOKE CHARTER SCHOOL

Dear Parents/Guardians:

Massachusetts Department of Public Health requirements must be completed before entry to school. Students from pre-kindergarten through grade 12 **may not enter** school until this documentation is reviewed by the nurse.

-Parents must complete a **health history** prior to enrollment. The form is enclosed and also available from the school, as well as online. It should be submitted to the school nurse as soon as completed.

-A signed **physical examination** performed by a US health care provider must be submitted at entry or within 30 days. Please arrange to meet with your school nurse to plan for any special health care needs or essential medications that must be administered at school.

-**Before entry to kindergarten**, your health care provider is required to test your child's **lead level** and **vision**. A copy of these results is requested and may be provided with the immunization record or physical exam.

-The following **immunizations** are required and must be documented and translated. Dates must include month and year and in some cases, exact date may be necessary to fully establish your child's immune status.
